## (2) Brief Biography

As a Consultant since January 1997 and Head of Department of Paediatric of Surgery since November 1999, I have been able to spearhead the development of Minimally Invasive Surgery. I have surgical experience in both General Pediatric Surgical and Pediatric Urology.

We now have several trained surgeons and have an experience on par with international centres. In Paediatric Urology I have developed the Urodynamic Service and with the Paediatricians, a dysfunctional voiding clinic.

I oversee the Advanced Specialty Training of Paediatric Surgeons in Singapore.

I also oversee the undergraduate medical students from NUS YLLSoM during their clinical posting in KKH since 2012.

I have served on many organising committees with the Academy of Medicine and following my Chairmanship in organising for AAPS, I was honoured to be elected for the President of AAPS on November 2004. I have since moved to being a Secretary General for AAPS.

I am an Examiner to FRCS/MRCSE since 2002 and I was appointed Chairman of International Medical Programme for KKH with effect from 1 April 2004.

In the hospital, I serve on the Medical Board. I am chairing the KK Regional Outreach Committee and I am a member of Tissue Audit Committee from Year 2000. I also served on the Emergency Planning Committee. I was the Editor of KK Review Journal Committee from 2000 – 2004. I was Adviser to the KK Review Journal Committee 2004-2006.

I am member of the Specialist Accreditation Committee, Paediatric Surgery and I serve as the Panel of Experts for Subordinate Court Mediation as appointed by the Ministry of Health. I also serve the Medical Council on mediation and medico legal matters.

In the past, I have served on Infection Control Committee and DRG Steering Committee in the hospital. I have been member of organising committees for the Academy of Medicine seven times for the Surgical Combined Meeting, as well as other regional and international meetings:

I have a strong and continuing interest in Surgical Outreach.

I liaise with various charitable organizations to get funding for overseas trainees to come to Singapore to study. I run the KKROK programme where we bring in disadvantaged kids needing surgery to KKH, and fund their treatment fully or partially. I also travel regionally to treat patients, teach and train local doctors.

## **(10) Education Activities (Teaching Portfolio)**

### **(A) Educational Philosophy (500 words max):**

To me, Pediatric Surgery is the most exciting of all surgical specialties. In teaching Pediatric surgery and general surgical principles I try to bring my enthusiasm for my chosen specialty to my students. I try to bring some humor into my presentations, as I remember myself in student days regularly falling asleep during long and boring purely theoretical lectures. I think if clinical scenarios are used in as many aspects of teaching as possible, then this will help to make the subjects come alive.

## **(17) Hobbies / Special Interests**

I have a strong and continuing interest in Surgical Outreach.

I liaise with various charitable organizations to get funding for overseas trainees to come to Singapore to study. I run the KKROK programme where we bring in disadvantaged kids needing surgery to KKH, and fund their treatment fully or partially. I also travel regionally to treat patients, teach and train local doctors.

My hobbies includes knitting, dancing and pilates / gyrokinesis.
